

Experiment-3

Car Booking Reservation System

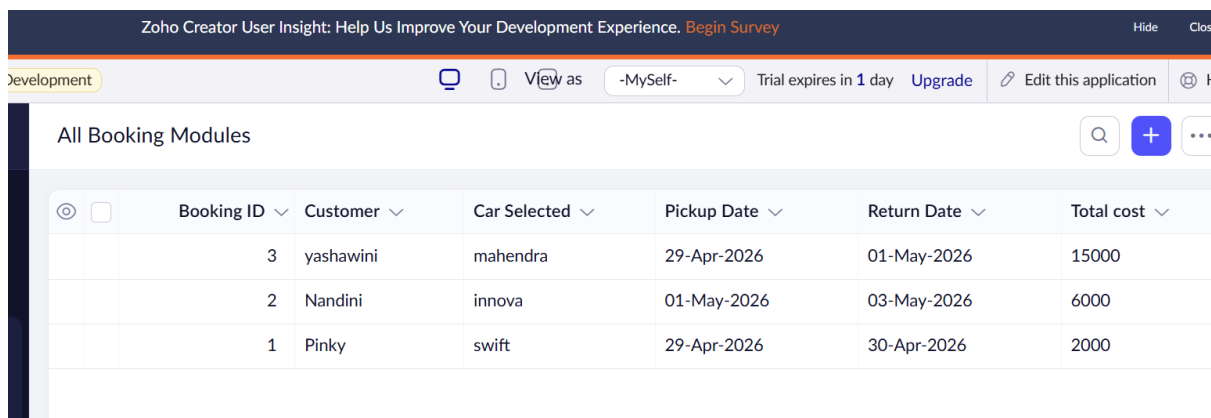

Aim

To develop a cloud-based Car Booking Reservation System using Zoho Corporation platform that enables users to book cars online, manage availability, and track bookings, thereby demonstrating the Software as a Service (SaaS) model

Procedure:

1. Login to Zoho Creator and create a new application.
2. Create forms for Cars, Customers, and Bookings.
3. Add required fields like car details, customer details, and booking dates.
4. Set logic to calculate total cost and check availability.
5. Create reports to view bookings and available cars.
6. Design a simple dashboard.
7. Deploy the application on cloud.

Output:

The screenshot displays the Zoho Creator interface. At the top, a dark blue header contains the text 'Zoho Creator User Insight: Help Us Improve Your Development Experience. [Begin Survey](#)' and buttons for 'Hide' and 'Close'. Below this is a light blue navigation bar with a 'Development' tab, a 'View as' dropdown set to '-MySelf-', and a 'Trial expires in 1 day' notification. The main content area is titled 'All Booking Modules' and features a table with the following data:

	Booking ID	Customer	Car Selected	Pickup Date	Return Date	Total cost
	3	yashawini	mahendra	29-Apr-2026	01-May-2026	15000
	2	Nandini	innova	01-May-2026	03-May-2026	6000
	1	Pinky	swift	29-Apr-2026	30-Apr-2026	2000

Result:

The Car Booking Reservation System was successfully developed using Zoho Creator. It allows users to book cars, check availability, and manage bookings online, demonstrating SaaS functionality.
