

## Experiment-5

### Library Management System

#### Aim

To develop a cloud-based Library Book Reservation System for SIMATS using Zoho Creator to manage book availability, reservations, and fine calculation, demonstrating SaaS implementation.

#### Procedure:

1. Login to Zoho Creator and create a new application.
2. Create forms for Books, Students, and Reservations.
3. Add fields like book details, student details, and issue/return dates.
4. Apply logic to check book availability.
5. Add fine calculation for late return.
6. Generate reports for issued and available books.
7. Deploy the application online.

#### Output:

The screenshot displays the Zoho Creator interface for a 'Student/user Modules' table. The table has five columns: 'Student Id', 'Name', 'Department', and 'Email'. There are four data rows. The interface includes a search bar and a '+ Add' button in the top right corner. The table is titled 'All Student/user Modules'.

| Student Id | Name                  | Department | Email                    |
|------------|-----------------------|------------|--------------------------|
| 4          | Nampalli Satish kumar | CSE        | satish2004@gmail.com     |
| 3          | Dumpa Sree Nandini    | EEE        | nandini03@gmail.com      |
| 2          | Namburi Yashaswini    | ECE        | yashaswini1501@gmail.com |
| 1          | Thanusri              | CSE        | thanusri02@gmail.com     |

#### Result:

The Library Book Reservation System was successfully implemented using Zoho Creator. It enables book reservation, availability tracking, and fine calculation through a cloud-based SaaS platform.
